Our Mission

The mission of the Brain Injury Association of Kentucky (BIAK) is to improve the lives of those affected by brain injury through advocacy, education, prevention, research, services and support. Staff in Louisville, Lexington and Bowling Green are assisted by volunteers throughout the state to carry out BIAK's mission in Kentucky.

We Invite You

The Brain Injury Association of Kentucky (BIAK) invites professionals, family members and others interested in acquired brain injury to learn about the latest trends in brain injury treatment and rehabilitation.

Summit Objectives

Participants will be able to:

1. Identify a variety of clinical and medical issues related to acquired brain injury.
2. Discuss resources available in Kentucky.
3. Identify strategies for coping and living with acquired brain injury.

Brain Injury Summit

Friday, April 13, 2007
Lexington, Kentucky

Featuring Keynote Speaker

Dr. Randal Schleenbaker
Wounded Soldiers, The Iraq War Injury: TBI

About Our Keynote Speaker

Dr. Randal Schleenbaker serves as the Medical Director of the Polytrauma Network Site at the Lexington VA. This Polytrauma Program was developed as a nationally integrated system of care to stabilize severely injured persons returning from the current war zone and assist them in their re-integration into their communities at the highest functioning level possible. Traumatic brain injury is considered the signature diagnosis of this current war.

Dr. Schleenbaker is also Associate Professor, Department of Physical Medicine and Rehabilitation, University of Kentucky Medical Center and Chief, Physical Medicine & Rehabilitation, VA Medical Center, Lexington, KY.

Dr. Schleenbaker will speak about the blast injuries occurring in Iraq / Afghanistan and the physical impact of these injuries necessitating lifelong medical, psychological, and case management needs. This presentation will describe the effects of IEDs and other explosives used in the Iraq War on the changing patterns of survival and injuries in our soldiers. Also discussed will be the current state of military medicine in treating these soldiers from the moment of injury through their rehabilitation and return home. Unique issues of TBI in these patients will also be presented.
